Pre-Op Blood Work

CONSENT FORM

“because we care”

Please read carefully and sign.

FELINE

Your cat is in for anesthesia/surgery and should do fine. We will perform a full physical examination on your cat before administering the anesthesia. However, we highly recommend a pre-anesthesia blood profile be performed. This will ensure that your pet is in a low risk category during anesthesia by ruling out pre-existing internal problems that **MAY NOT BE EVIDENT PHYSICALLY**, but could possibly lead to complications. **There are *additional fees* for these important procedures.** Please indicate your choice by marking either agree or disagree and sign the bottom of this consent form.

BLOOD PROFILE

Recommended	Test	Agree	Disagree
1	CBC & Preanesthesia Panel*		
2	Feleuk/FIV Test**		

*Indicates systemic infection, blood clotting ability, anemia, liver & kidney function

**A test that is especially important in kittens, stray cats, a cat that spends ANY time outdoors, or in cats that have gingivitis (gum inflammation) or sores in their mouths.

PAIN MANAGEMENT

Product Option	Agree	Disagree
Injectable (automatically given in hospital for declaws)		
Lixotinic/Torbugesic Liquid (take home)		

VACCINATION STATUS

Vaccination	Current*	Agree	Disagree
** Eclipse IV (distemper series)			
** Rabies (Imrab or Purevax)			
Feleuk (2 part series 1 st year, then annual)	optional		

*Proof Required; ** Required for surgery/hospitalization
